Chapter 1

About

1.1 What is it?

- **MarkdownSlides** is a Reveal.js, Deck.js and PDF slides generator **from** **MARKDOWN** files, that also generate HTML, ODT and DOCX documents.

1.2 Samples

- From a [MARKDOWN](#) file generate:

- [reveal-slides](#)
- [reveal-slides-alternative](#)
- [reveal-pdf-slides](#)
- [reveal-pdf-slides-alternative](#)
- [deck-slides](#)
- [deck-slides-alternative](#)
- [pdf-beamer](#)
- [pdf](#)
- [html](#)
- [docx](#)
- [odt](#)

1.3 Licence

- This work is licensed under a:
 - [Creative Commons Attribution 3.0](#)
- The program source code are licensed under a:
 - [GPL 3.0](#)

Chapter 2

Instalation and how to use

2.1 Dependencies

- [Pandoc](#) (needs to be installed)
- [Phantom.js](#) (needs to be installed)
- [Reveal.js](#) (automaticaly downloaded)
- [Deck.js](#) (automaticaly downloaded)

2.2 Creation

- First **copy the doc folder and rename it as you like**. This is not necessary but helps you organize your documents.
- **Create the md files** that you want to generate in the **md folder**. The md files are [Markdown](#) files which are nothing more than plain text files with extension md, and a lightweight markup (we should know it but it is very simple).
- Once created the md files, **we can generate with an script**.
 - reveal-slides
 - reveal-pdf-slides
 - deck-slides
 - pdf-beamer
 - pdf
 - html
 - docx
 - odt

2.3 Build

- To **convert all md files of all the folders** go to the root folder and execute:

```
./build.sh
```

- To **convert all md files of one folder** go to the root folder and execute:

```
./build.sh [folder_name]
```

Chapter 3

Author

3.1 Adolfo Sanz De Diego

3.1.1 My Resume

- Old JEE web developer
- Today:
 - **Computer teacher:**
 - * Hardware, Operating Systems
 - * Networking, Programming
 - **Freelance Trainer:**
 - * Java, Android
 - * JavaScript, jQuery
 - * JSF, Spring, Hibernate
 - * Groovy & Grails
 - I like to develop

3.1.2 Hackalover

- For hackathons lovers
 - **Meetup:** <http://www.meetup.com/Hackathon-Lovers/>
 - **Twitter:** <http://twitter.com/HackathonLovers>
 - **Blog:** <http://hackathonlovers.tumblr.com/>
 - **LinkedIn:** <http://www.linkedin.com/groups/Hackathon-Lovers-6510465>
 - **YouTube:** <http://www.youtube.com/channel/UCRwSe7jK-y62BMvLiNBV1qw>

3.1.3 Tweets Sentiment

- Is a **tweets analyzer** which extracts semantic information to know if the general tweets feeling about a topic is positive or negative.
 - Web: <http://tweetssentiment.com/>
 - Twitter: <http://twitter.com/TweetsSentiment>

3.1.4 Where to find me?

- My nick: **asanzdiego**
 - AboutMe: <http://about.me/asanzdiego>
 - GitHub: <http://github.com/asanzdiego>
 - Twitter: <http://twitter.com/asanzdiego>
 - Blog: <http://asanzdiego.blogspot.com.es>
 - LinkedIn: <http://www.linkedin.com/in/asanzdiego>
