

MarkdownSlides

Adolfo Sanz De Diego

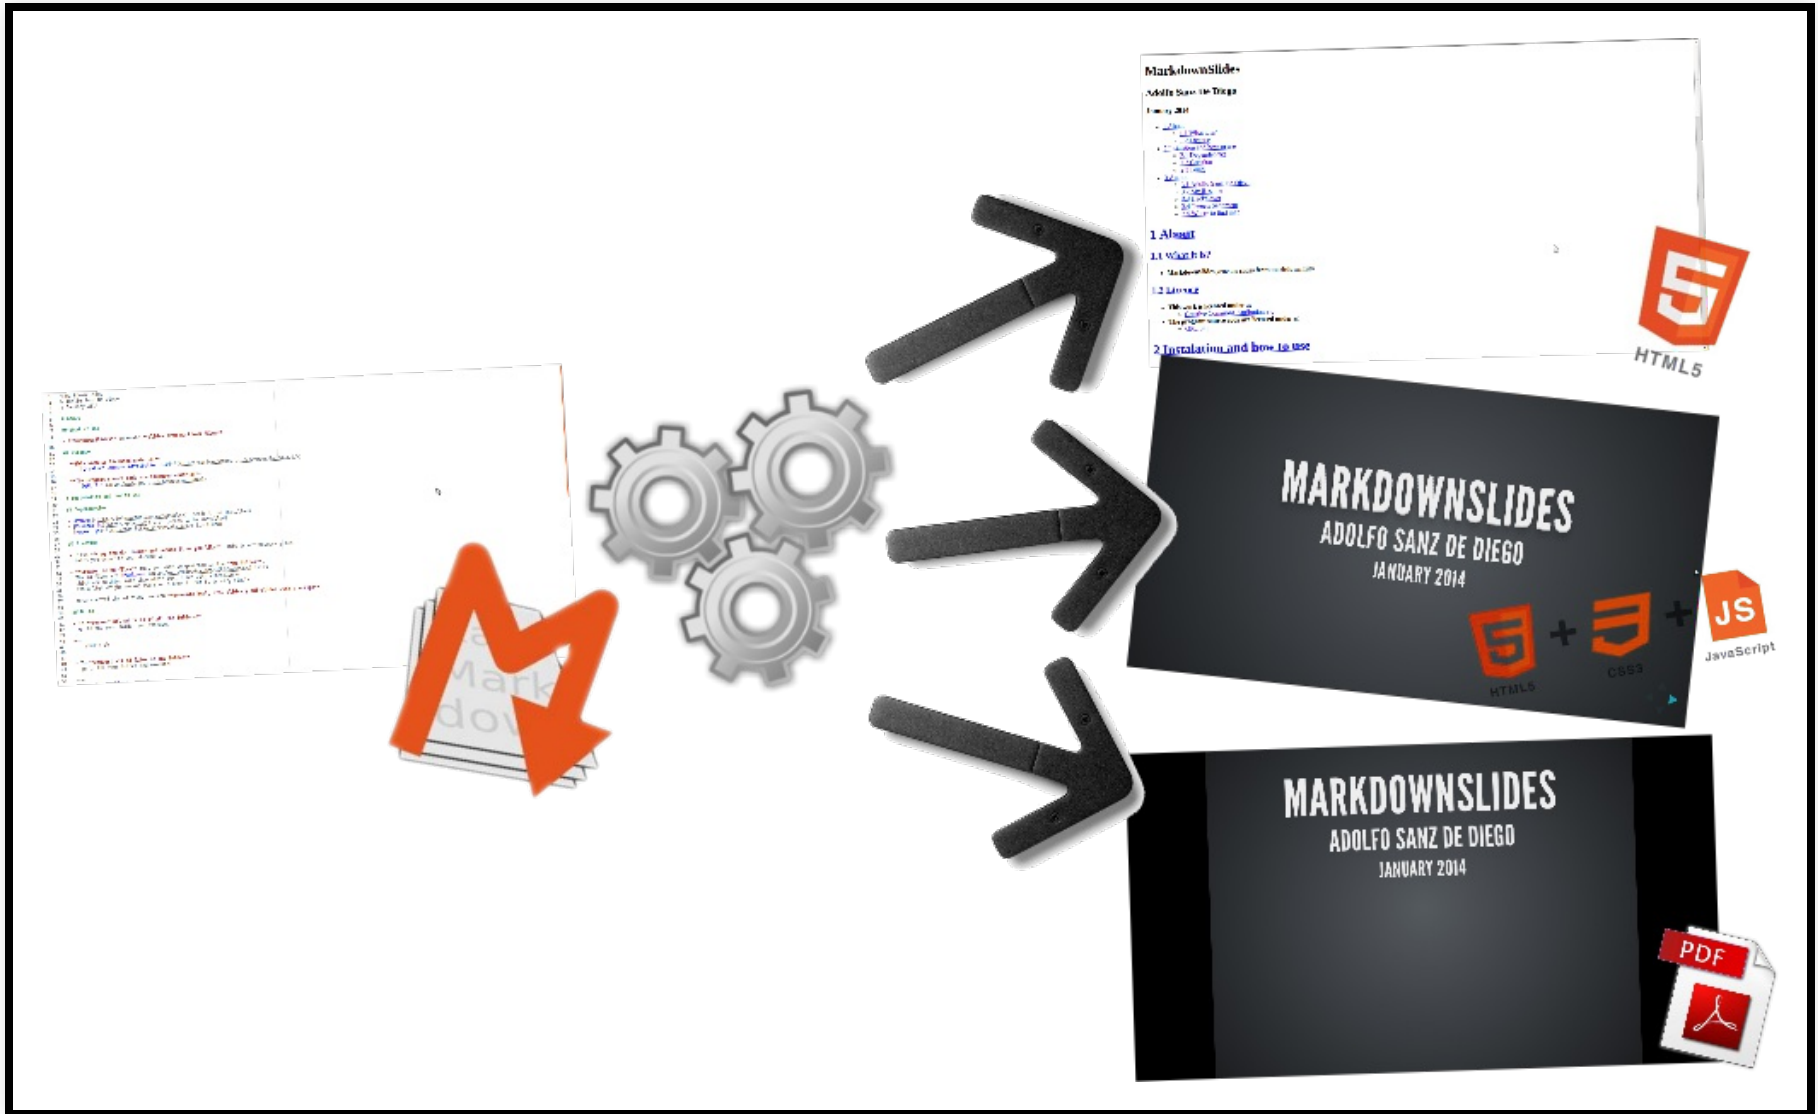

January 2014

1 About

1.1 What is it?

- **MarkdownSlides** is a HTML and PDF **slides** generator **from MARKDOWN files**.

1.2 MarkdownSlides

1.3 Licence

- **This work is licensed under a:**
 - Creative Commons Attribution 3.0
- **The program source code are licensed under a:**
 - GPL 3.0

2 Instalation and how to use

2.1 Dependencies

- [Pandoc](#) (needs to be installed)
- [Phantom.js](#) (needs to be installed)
- [Reveal.js](#) (included)

2.2 Creation

- First **copy the doc folder and rename it as you like**. This is not necessary but helps you organize your documents.
- **Create the md files** that you want to generate in the **md folder**. The md files are **Markdown** files which are nothing more than plain text files with extension md, and a lightweight markup (we should know it but it is very simple).
- Once created the md files, we can **generate html, html-slides y pdf-slides with a script**.

2.3 Build

- To **convert all md files of all the folders** go to the root folder and execute:

```
./build.sh
```

- To **convert all md files of one folder** go to the root folder and execute:

```
./build.sh [folder_name]
```

3 Author

3.1 Adolfo Sanz De Diego

3.2 My Resume

- **Old JEE web developer**
- **Today:**
 - **Computer teacher:**
 - Hardware, Operating Systems
 - Networking, Programming
 - **Freelance Trainer:**
 - Java, Android
 - JavaScript, jQuery
