

MARKDOWNSLIDES

ADOLFO SANZ DE DIEGO

JANUARY 2014

1 ABOUT

1.1 MARKDOWNSLIDES

1.2 WHAT IS IT?

- **MarkdownSlides** is a HTML and PDF **slides** generator **from MARKDOWN files**.

1.3 LICENCE

- This work is licensed under a:
 - [Creative Commons Attribution 3.0](#)
- The program source code are licensed under a:
 - [GPL 3.0](#)

2 INSTALATION AND HOW TO USE

2.1 DEPENDENCIES

- [Pandoc](#) (needs to be installed)
- [Phantom.js](#) (needs to be installed)
- [Reveal.js](#) (included)

2.2 CREATION

- First **copy the doc folder and rename it as you like**. This is not necessary but helps you organize your documents.
- **Create the md files** that you want to generate in the **md folder**. The md files are **Markdown** files which are nothing more than plain text files with extension md, and a lightweight markup (we should know it but it is very simple).
- Once created the md files, we can **generate html, html-slides y pdf-slides with a script**.

2.3 BUILD

- To **convert all md files of all the folders** go to the root folder and execute:

```
./build.sh
```

- To **convert all md files of one folder** go to the root folder and execute:

```
./build.sh [folder_name]
```

3 AUTHOR

3.1 ADOLFO SANZ DE DIEGO

3.2 MY RESUME

- **Old JEE web developer**
- **Today:**
 - **Computer teacher:**
 - Hardware, Operating Systems
 - Networking, Programming
 - **Freelance Trainer:**
 - Java, Android
 - JavaScript, jQuery
 - JSF, Spring, Hibernate
 - Groovy & Grails
 - **I like to develop**

3.3 HACKALOVER

The logo for Hackathon Lovers is displayed within a white rectangular border. It consists of two horizontal bars. The top bar is red and contains the word "Hackathon" in black, sans-serif font. The bottom bar is black and contains the word "Lovers" in red, sans-serif font, with each letter of "Lovers" being significantly larger than the letters in "Hackathon".

Hackathon
L o v e r s

- **For hackathons lovers**
- **Meetup:** <http://www.meetup.com/Hackathon-Lovers/>
- **Twitter:** <http://twitter.com/HackathonLovers>

3.4 TWEETS SENTIMENT

- Is a **tweets analyzer** which extracts semantic information to know if the general tweets feeling about a topic is positive or negative.
- **Web:** <http://tweetssentiment.com/>
- **Twitter:** <http://twitter.com/TweetsSentiment>
