1 About

# 1.1 What is it? (I)

- **MarkdownSlides** is a Reveal.js, Deck.js and PDF slides generator from **MARKDOWN** files, that also generate HTML, ODT and DOCX documents.

## 1.2 What is it? (II)

# 1.3 Samples

- From a **MARKDOWN** file generate:
  - deck-slides
  - deck-slides-alternative
  - reveal-slides
  - reveal-slides-alternative
  - reveal-pdf-slides
  - reveal-pdf-slides-alternative
  - html
  - docx
  - odt

# 1.4 Licence

- This work is licensed under a:
  - Creative Commons Attribution 3.0
- The program source code are licensed under a:
  - GPL 3.0

# 2 Instalation and how to use

## 2.1 Dependencies

- [Pandoc](#) (needs to be installed)
- [Phantom.js](#) (needs to be installed)
- [Reveal.js](#) (automatically downloaded)
- [Deck.js](#) (automatically downloaded)
- Now, only works in Linux (may be on MacOS)

## 2.2 Download

- <https://github.com/asanzdiego/markdownslides/archive/maste>

## 2.3 Creation (I)

- First **copy the doc folder and rename it as you like**. This is not necessary but helps you organize your documents.
- **Create the md files** that you want to generate in the **md folder**. The md files are **Markdown** files which are nothing more than plain text files with extension md, and a lightweight markup (we should know it but it is very simple).

## 2.4 Creation (II)

- Once created the md files, **we can generate with an script.**
  - reveal-slides
  - reveal-pdf-slides
  - deck-slides
  - pdf-beamer
  - pdf
  - html
  - docx
  - odt

# 2.5 Build

- In the root folder you have to execute:

```
./build.sh [mode] [folder]
```

- Where **[mode]** can take the next values:
  - **"min"**: generate deck-slides and plain html.
  - **"med"**: generate also reveal-slides, docx and odt (**default value**)
  - **"max"**: generate all formats.
- And where **[folder]** is the name of the folder wher to find the md files. If no folder name, it will convert all md files of all the folders.

3 Author

## 3.1 Adolfo Sanz De Diego

- Old JEE web developer
- Now I'm **Tecnical Teacher Advaisor** in the TIC service of the General Direction of Infrastructure and Services of the Ministry of Education, Youth and Sports of the Community of Madrid.
- In addition I work as **trainer specialized in development technologies**.

## 3.2 Algunos proyectos

- **Hackathon Lovers** <http://hackathonlovers.com>: a group created for entrepreneurs and developers who loves hackathones.
- **Password Manager Generator** <http://pasmangen.github.io>: an online password manager.
- **MarkdownSlides**  
<https://github.com/asanzdiego/markdownslides>: a script to create slides from MD files.
